

Privacy Door Latch:

Increase Privacy, Reduce Door and Frame Damage

The PEMKO Privacy Door Latch (PDL) is recommended for environments with corridor to interior openings such as hotels or dormitories. This durable accessory allows the door to be opened for identification while providing privacy for the guest or resident.

The design of the PDL does not allow the door to be held open, avoiding the door and frame damage caused by the door slamming against a traditional flip latch or chain. The PDL's silicone pads provide additional protection for the door.

The PDL is UL Classified as a fire door accessory. It also meets the requirements of NFPA 80 Sections 5.2.4.2 and 5.2.13.3, that requires auxiliary hardware does not interfere or prohibit the proper operation of fire rated doors, and that doors are not blocked or wedged in the open position.

Features	Benefits
Simple to operate	Easy for guests/residents to use
Deters unauthorized entry	Increases guest privacy
Cannot be used to hold door open	Meets NFPA 80 5.2.13.3
Does not interfere with proper door operation	Meets NFPA 80 5.2.4.2(9) for auxiliary hardware items
Easy to install	Saves time on the job

Applications:

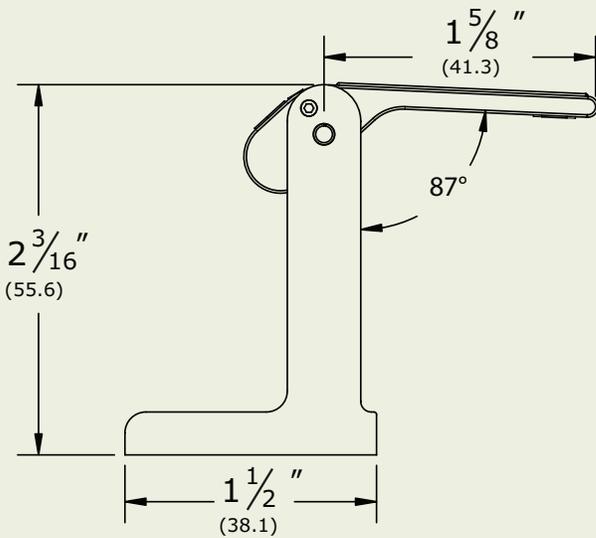

- Hospitality
- University Housing
- Military Housing
- Condominiums
- Apartment Buildings
- Private Residences

Technical Specifications:

Material: Z5 Zamak
Height: 2-3/16" (55.6 mm)
Width (Base): 1-1/2" (38.1 mm)
Width (Open): 2-3/4" (69.8 mm)
Weight: 0.75 lbs./unit
Opening Angle: 87°
Fasteners: Supplied with #12 x 1-3/4" Phillips Flat Head screws

Finishes:

- US3 Polished Brass
- US4 Satin Brass
- US10B Oil Rubbed Bronze
- US26 Polished Chrome
- US26D/15 Satin Chrome/Satin Nickel

Privacy Solutions

Door guards, flip latches and sliding chains have been used as means to provide privacy for guests and residents. However, these devices have been misused to prop doors open, causing damage to the door and frame as well as defeating the purpose of a fire rated door.

The PEMKO Privacy Door Latch allows guests or residents to identify persons outside the door without fully opening the door. The PDL cannot be used to hold the door open, allowing for privacy, preventing damage, and meeting NFPA Requirements.
